PAVEMENT AND GRADING NOTES

1. ALL MOLDED CURB AND GUTTER TO BE MODIFIED TO MATCH CURB AND GUTTER ALONG BOUNDARY NORTHERN MOLDLINE.
2. ALL MOLDED CURB AND GUTTER TO BE PLACED 6 INCHES FROM EXISTING CURB AND GUTTER ALONG BOUNDARY.
3. ALL EXISTING CURB AND GUTTER TO BE PLACED 6 INCHES FROM EXISTING CURB AND GUTTER ALONG BOUNDARY.
4. ALL CONCRETE CURB AND GUTTER TO BE MODIFIED TO MATCH EXISTING CURB AND GUTTER ALONG BOUNDARY.
5. REFER TO SHEET D-1 FOR CURB AND GUTTER DETAILS AND FOR PAVEMENT AND THE AMOUNT OF DETAIL.
6. REFER TO SHEET D-1 FOR CURB AND GUTTER DETAILS.
7. REFER TO SHEET D-1 FOR CURB AND GUTTER DETAILS AND FOR PAVEMENT AND THE AMOUNT OF DETAIL.
8. REFER TO SHEET D-1 FOR CURB AND GUTTER DETAILS.
EROSION AND SEDIMENT CONTROL NOTES

MINIMUM REQUIREMENTS:

1. The owner, designer, and contractor on the project shall provide the minimum erosion and sediment control measures required to protect the construction site. The owner shall be responsible for monitoring the site and ensuring that all erosion and sediment control measures are in place and functioning properly.

2. The contractor shall perform daily inspections to ensure that all erosion and sediment control measures are in place and functioning properly. These inspections shall include checking for proper condition and operation of erosion control devices, as well as monitoring for signs of erosion.

3. Erosion control measures shall be installed before any grading or excavation is performed to minimize the impact of soil disturbance on the surrounding environment.

4. All disturbances to the surface of the ground shall be maintained in a stable condition and protected from further erosion.

SCHEDULE FOR INSTALLATION, INSPECTION, AND MAINTENANCE:

1. All erosion control measures shall be installed before the start of construction and shall be inspected by the owner, designer, and contractor.

2. Erosion control measures shall be maintained in a stable condition and protected from further erosion.

3. Erosion control measures shall be inspected daily by the contractor and by the owner or their agent.

4. Erosion control measures shall be maintained in a stable condition and protected from further erosion.

STANDARD BMPs AND CONTROLS:

1. All disturbed areas shall be protected with temporary erosion control measures, such as silt fences, to minimize soil erosion.

2. Erosion control measures shall be installed before the start of construction and shall be inspected by the owner, designer, and contractor.

3. Erosion control measures shall be maintained in a stable condition and protected from further erosion.

4. Erosion control measures shall be inspected daily by the contractor and by the owner or their agent.

5. Erosion control measures shall be maintained in a stable condition and protected from further erosion.

SPECIAL NOTES:

1. The contractor shall install erosion control and sediment control measures as required by the owner, designer, and the local building code.

2. The contractor shall provide daily inspections and maintenance of erosion and sediment control measures to ensure their proper operation.

3. All erosion and sediment control measures shall be designed and installed in accordance with the local building code.

4. The contractor shall be responsible for any damage to the construction site caused by erosion or sediment control measures.
